SECTION I

1 Introduction

Chhattisgarh State Renewable Energy Development Agency (CREDA) is implementing number of innovative projects. The schemes include Solar Dual Pump for drinking water supply, solar community irrigation system, solar power plants installed in health centers, solar power plant and power pack installed in hostel/ashram, solar R.O. purification, solar high mast system and remote village electrification. It serves the purpose of saving non renewable energy and reducing carbon footprints and thereby helping in mitigating the challenges of climate change. The numbers of systems under prime schemes installed are as follows:

SN	Name of the schemes	Numbers installed	Blocks covered
01	Solar Dual Pump	7126	146
02	solar community irrigation system	146	146
03	solar power plants installed in health centers	927	146
04	solar power plant and power pack installed in hostel/ashram	1664	146
05	solar R.O. purification	176	146
06	solar high mast system	541	146
07	remote village electrification	1271	146

The schemes are being installed from 2002 but majority of the works have been carried out in the past Five years.

2 Terms and Conditions

2.1 DEFINITIONS:

- 2.1.1 CREDA means Chhattisgarh State Renewable Energy Development Agency

SECTION III

3 SCOPE OF WORK –

A. Establishment and Operation

The present proposal is submitted with an objective to study how the scheme has benefitted the people

- I. To access uninterrupted safe and potable drinking water
- II. Whether and how the scheme has reduced the drudgery of the rural women and increases their social mobility
- III. How the water is being used by the people and whether the water is being used for any other productive purposes.
- IV. whether the scheme has acted as a driver to reduce conflict and increase the self esteem of the people of the village.
- V. What has been the impact of the scheme in improving the quality of life of the people.

B. Approach and Methodology

- The study will be conducted following a multi pronged approach of structured questionnaire survey to collect quantitative data as well as participatory assessment methods to collect qualitative data and to gain the insights for analysis.
- Quantitative data will be collected from the sample villages. The sample villages will be selected following the standard methodologies described in the following section. Data will also be collected from the control villages adjoin the sample experimental villages to have a comparative analysis and to understand the real impact of the scheme on the people.
- Different survey instruments will be used to collect the data as follows:
- Structured Questionnaire survey that will be administered among the sample beneficiaries to assess their perception about the potential benefits of the scheme
- Semi structured interviews will be conducted with the officials of PHED to understand how the scheme has benefitted to achieve the overall goal of the providing safe and potable drinking water to the people and its future potentials
- Semi structured interviews will be conducted with the officials of CREDA to understand their perception about the scheme
- Semi structured interviews will be conducted with the Mitanin/Sub centre/PHC workers to understand whether there is any change in the water borne disease pattern in the village after installation of the scheme
- Focus Group Discussions will be conducted especially among the women of the villages to know their perception of benefits from the scheme

- Recall methods will be used to understand the situation that existed before installation of the scheme.
- While conducting the interview of the sample beneficiaries, small video clippings will be shot to have authenticity of the data.
- GPS readings of the sample sites visited will be collected and provided in the report.

C. List of Activities to be implemented

1. To organize inception meeting with PMU
2. To submit an inception report
3. To finalize the inception report in consultation with PMU.
4. To organize DMU-level inception meeting.
5. To inform the field functionaries of the Project well in advance for the visits.
6. To train field investigators
7. To collect and review all the necessary documents and secondary data.
8. To undertake assessment activities in the field as per the methodologies agreed.
9. To supervise the field assessment activities
10. To answer inquiries that may be asked by the Project
11. To organize bi-weekly feedback meeting at the DMU level
12. To complete the data on assessment results for analysis
13. To analyze the assessment result for analysis
14. To submit the draft final report
15. To finalize final report and submit it to PMU

D. Sampling

- About 5% of the schemes installed will be covered for the study on sample basis.
- Stratified random sampling method will be followed for sample selection. At the first level stratification of the blocks will be made where blocks having 50 or more will be identified. Within the sampled blocks further stratification will be made based on the criteria where schemes are installed before four years, between four to two years and within one year. Random sampling method will be followed covering three categories to understand the levels and depth of impact.
- However, to understand the multiplier impact on the socio economic and ecological aspects purposive sampling method will be followed to select such schemes within the sample block where dual drinking water system, solar electrification of the PHCs and may be irrigation schemes are running in the same village or in the areas nearby the village.
- About 7 - 10 beneficiaries will be interviewed per village.
- The sample villages/sites shall be approved by CREDA necessary.

The comparative study will be conducted covering around 100 control villages in the vicinity of the experimental villages. About 5 people will be interviewed per village.

E. Output/Deliverables

1. Two hard copies along with soft copy of Inception Report, including detail methodologies, a set of data collection sheets, a list of sample locations to be submitted within seven days of inception of the work
2. Two hard copies along with soft copy (pdf and Ms-Word) of Draft Final Report, including:
 - a. Executive Summary
 - b. Descriptions of methodologies and process of assessment
 - c. Summary of data / assessment results, findings and analysis using adequate number of graphs, maps, charts, figures, diagrams, photos and other visual aids.
 - d. Field observations and result of discussions
 - e. Remarks and suggestions
 - f. Photo album with proper captions
 - g. Compiled data (MS-Excel/Access format) of the result of detailed inventory of each of the project
 - h. Entire data sets (MS-Excel/Access format)
3. One set of GPS information
4. Five hard copies along with soft copy of (pdf and MS-Word) of Final Report.
