Other important requirement

The "Motor Pump Set" should following features:

- > The mono block AC centrifugal motor pump set with the impeller mounted directly on the motorshaft and with appropriate mechanical seals which ensures zero leakage.
- > The suction and delivery head will depend on the site specific condition of the field.
- ➤ The pumps used for solar application should have a 5 years warranty so it is essential that the construction of the pump be made using parts which have a much higher durability and do not need replacement or corrode for at least 5 years.
- ➤ Provision for remote monitoring of the installed pumps must be made in the controllers or the inverters either through an integral arrangement or through an externally fitted arrangement. It should be possible to ascertain the daily water output, the power generated by the PV array, the UP TIME of the pump during the year, Number of days the pump was unused or under breakdown/repairs.
- > The following details should be marked indelibly on the motor pump set
 - a) Name of the Manufacturer or Distinctive Logo.
 - b) Model Number.
 - c) Serial Number.
